**ABSTRACT**

A communication method for a mobile terminal to perform seamless handover between a WWAN and a WLAN, ~~comprising steps of:~~ The method comprises receiving a registration message sent by ~~said~~the mobile terminal when it enters ~~said~~the WLAN, wherein ~~said~~the registration message at least contains a WLAN address that ~~said~~the mobile terminal acquires when entering ~~said~~the WLAN; establishing the mapping relationship between ~~said~~the WWAN address and ~~said~~the WLAN address of ~~said~~the mobile terminal according to ~~said~~the registration message; encapsulating ~~said~~the WLAN address into the data information to be sent to ~~said~~the mobile terminal according to ~~said~~the mapping relationship when receiving the data information to be sent to ~~said~~the mobile terminal from a source address; and sending the data information containing ~~said~~the WLAN address to ~~said~~the mobile terminal via ~~said~~the WLAN.
